## Work Experience

### Back End Developer / Foxminded.ua

 Jan 2022 - **Current**

Updating, maintaining, fixing existing APIs, services. Refactor code and build new features. I worked on a study project, intended for those, who recently finished internship in their academy and need practice in real project.

### Web Developer / BakDevelopment

 October 2020 - December 2021

My responsibilities were mainly administration, maintaining and service of the company's website that was built in WordPress. Also implementing extra features, uploading new content. I didn't write or refactor a lot of code and at the same time wanted to go deeper into programming. So I applied for internship into Foxminded.ua company and then started learning more professional skills of PHP.

### 3d Artist / BakDevelopment

 Jan 2020 - October 2020

Before I started working as a Web developer, I used to work 3d Artist with CG-graphic making static renders for real estate and dynamic renders using Unreal Engine 4 technologies. Then I switched job position within the same company.

## Education

### Czech Technical University in Prague

 September 2016 - February 2022

Bachelor degree

### Online courses Foxminded.ua in Kiev

 Jan 2022 - July 2022

I have been studying on their online courses for 3 months. This is school which is located in Kiev and offers at first to finish their academy and after that to try working at a real project to get experience in programming. So here I got all basic and some more professional knowledge and skills in programming like PHP syntax, working with database MySQL, some experience with frameworks Laravel and then Symfony, GIT and many others.
